Daily Morning Analysis Report

Friday, 19 June 2026

CONTENTS

- Technical Outlook for Gold and Silver Market
- Trends and Key Price Levels
- Updates on economic indicators and upcoming data releases

Daily Market Report

- Gold weakens further below \$4,200 as the Fed's hawkish stance overshadows relief from the US-Iran peace deal.
- Silver falls to near \$70.50, pressured by rising Fed rate-hike odds despite the easing geopolitical backdrop.
- The US ended its naval blockade as Iran's supreme leader claimed Trump made the deal "out of desperation."
- WTI falls to near \$75.00 as shipping conditions improve in the Strait of Hormuz, easing supply concerns.
- The Pound slipped after the BoE held rates steady, adding to broad USD strength across forex markets.
- Gold retreated sharply after a Fed shock sent the US Dollar to fresh year-to-date highs.
- Silver remains bearish below its 200-day SMA, with bears now eyeing a drop toward \$61.50.
- Gold's decline highlights how hawkish Fed signals are now outweighing the de-escalation in the Middle East.
- With the Iran conflict cooling, traders are shifting focus back to Fed policy as the dominant driver for gold and silver.
- The USD Index holds near 101.00, sitting close to a one-year high on the hawkish Fed outlook.
- With Hormuz shipping normalizing and the naval blockade lifted, oil's geopolitical risk premium continues to unwind, adding further downside pressure on inflation-linked assets like gold.
